

VARUN S

Data Analyst & Data Engineer | Business Analytics | SQL | Power BI | Azure | AI-Powered Analytics | Available Immediately
Bangalore, India | 8903070652 | varunaadithiya@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFILE SUMMARY

MBA (Business Analytics) Data Analyst and aspiring Data Engineer, building dashboards, SQL models and Azure ETL pipelines that turn operational data into decisions. Proficient in SQL, Power BI (DAX, Data Modeling, Power Query), Advanced Excel, Looker Studio and SPSS, with a statistical foundation in correlation, regression and hypothesis testing. Also ships the analysis as software, with four production applications released including a fitness tracker live on Google Play.

CORE COMPETENCIES

- Data Analysis & Business Intelligence • Dashboard & Report Development (Power BI, Looker Studio, Tableau) • SQL & Database Management
- ETL Pipeline Development • Cloud Data Engineering (Azure) • Statistical Analysis & Hypothesis Testing • Data Cleaning & Transformation
- KPI Monitoring & Performance Analytics • Requirement Gathering & Documentation • Stakeholder Management • Data Quality & Integrity • AI-Powered Analytics • Machine Learning for Business • Predictive Analytics • Business Process Analysis • Data-Driven Decision Making

TECHNICAL SKILLS

- **BI & Visualization:** Power BI (DAX, Data Modeling, Power Query), Looker Studio, Tableau, Advanced Excel (Pivot Tables, VLOOKUP, Data Modeling)
- **Languages & Analytics:** SQL (Joins, CTEs, Window Functions, Subqueries, Aggregations), Python (Pandas, NumPy, practice level), R (foundational), SPSS
- **Cloud & Data Engineering:** Azure Data Factory, Azure Databricks, Azure Synapse Analytics, Azure SQL Database, Azure Key Vault, Dataflows, ETL Pipelines
- **Statistical Methods:** Descriptive Statistics, Pearson Correlation, Multiple Regression, Hypothesis Testing, Reliability Analysis, ROI Analysis
- **AI & Emerging Tech:** Generative AI (IBM certified), Machine Learning for Business, AI-powered application development, ChatGPT & Gemini for research & analysis
- **Application Development:** FastAPI, PostgreSQL, Next.js, React, TypeScript, React Native (Expo), Capacitor, Firebase (Firestore, Auth, Security Rules), Google Health Connect

PROJECTS

ForgeInsight - AI-Powered Data Analytics Workspace

[ai-data-analytics-workspace.vercel.app](#)

AI | Python | Web Application

- Delivered a full-stack AI-powered analytics workspace that lets a user with no coding background complete an exploratory analysis end to end, by building dataset upload, automated EDA and AI-driven insight generation into a single browser-based workflow.

Retail Sales & Inventory Analytics Platform

SQL | Azure Data Factory | Azure SQL Database | Power BI (DAX, Power Query)

- Automated ingestion of 100,000+ sales and inventory records through 3 ETL pipelines, delivering 8 revenue, product performance and stock KPIs in one refreshable report in place of manual extracts, by building an Azure Data Factory pipeline into Azure SQL Database behind a Power BI semantic model.

E-Commerce Customer & Sales Analytics

SQL | Power BI

- Identified revenue patterns, customer behaviour and seller performance across 6 joined transactional tables, surfacing operational optimisation opportunities for the business, by writing multi-table SQL analyses over orders, payments, products, customers, sellers and order items and reporting them in Power BI.

HR Analytics Dashboard

Looker Studio

- Consolidated attrition, demographics, job roles, compensation and satisfaction into one interactive workforce dashboard, replacing ad-hoc HR reporting with a self-serve view, by modelling the employee dataset and building filtered visuals in Looker Studio.

Banking & Financial Transaction Analysis System

SQL | Excel | Power BI

- Flagged fraud indicators and segmented customers across 75,000+ financial transactions, reporting the results across 5 performance dimensions, by writing 20+ advanced SQL queries using joins, window functions and subqueries feeding Power BI reports.

IGNYT - Offline-First Fitness & Nutrition Tracker

[Google Play](#) | [ignyt-tfit-in.vercel.app](#)

Next.js | Capacitor | Android | Google Health Connect | Swift (HealthKit plugin) | Codemagic CI

- Published an Android application to Google Play (com.varun.ignyt) carrying a 1,000+ exercise library, HYROX plans, nutrition, hydration, fasting and body-weight tracking, fully usable with no network and no account, by building an offline-first Capacitor app with two-way Google Health Connect sync and releases automated through Codemagic CI.

IGNYT Coach - Trainer & Gym SaaS Platformignyt-coach.vercel.app

FastAPI | PostgreSQL | Next.js | Capacitor | Payments

- Launched a multi-tenant platform covering clients, programmes, meal plans, check-ins, messaging and billing, giving trainers and gyms one system in place of separate tools, by building a FastAPI and PostgreSQL backend behind a Next.js dashboard that syncs assigned work into the client's IGNYT app.

MoneyVault - Personal Finance Command Center

React | TypeScript | Tailwind | Capacitor | Data Import

- Derived budgets, goals, net worth, cash-flow projection and payday allocation from a single live ledger, removing any drift between the reported figures and the underlying transactions, by implementing CSV, Excel and PDF statement ingestion through a column mapper and categorisation rules with an audit trail and per-import undo.

AuraVault - Family Health Record Platform

React Native (Expo) | Firebase | Firestore | OCR | AI Assistant

- Consolidated a household's dependents, medical records, medicines, vaccinations, appointments, insurance and expenses into one mobile app with no cross-account access to any family's records, by enforcing ownership in Firestore security rules by document path and adding OCR document processing and an AI health assistant.

Formula Student Brake SystemB.E. Final Year Project | 2024

Engineering Design | Vehicle Dynamics | Component Selection

- Designed a braking system that cleared competition scrutineering for a Formula Student vehicle, by running braking performance calculations, selecting components against them and validating the vehicle safety requirements.

INTERNSHIP EXPERIENCE

Aruna Agencies - Business Analytics InternNamakkal | May 2025 - Nov 2025

- Surfaced profitability trends, anomalies and performance gaps across 50,000+ rows of sales and operational data, informing operational decisions for the business, by analysing them in SQL, Advanced Excel, Power BI and SPSS.
- Evaluated market positioning and identified business development opportunities across 13 competitor outlets, by running customer research with approximately 150 farmers and analysing satisfaction trends against the competitor findings.
- Delivered 10+ structured analytical reports and dashboards that directly informed operational and strategic decisions, by translating complex datasets into findings senior stakeholders could act on.
- Reduced manual reporting effort by approximately 40%, by documenting business requirements and SOPs and automating Power BI refresh over standardised data pipelines.

MBA THESIS - RESEARCH PROJECT

Impact of Agricultural Machinery Adoption on Crop Returns2026

Economic Analysis Using ROI Framework | CMS Business School, Jain University

- Established that 84.94% of 166 surveyed farming households reported positive ROI and 83% reported yield improvement after machinery adoption, by applying descriptive statistics, Pearson correlation, multiple regression, reliability analysis (Cronbach's Alpha 0.7789) and hypothesis testing to primary survey data.

CERTIFICATIONS

- Building Generative AI-Powered Applications with Python
- AI for Solving Business Problems
- Machine Learning for Business
- Security Analytics and Portfolio Management
- Corporate Governance & Practices
- Basic Statistics
- Financial Accounting Fundamentals
- Organizational Behavior: How to Manage People

LEADERSHIP & ACHIEVEMENTS

- SAE Student of the Year (2024)** - Won the chapter's annual award for technical contribution and leadership, by sustaining three consecutive years of competition work across the EV and Formula Student campaigns.
- Team Manager, SAE SUPRA (2023)** - Led a 30-member Formula Student team to 2nd place among approximately 80 teams nationally, by coordinating subsystem schedules and carrying technical decisions through to a car that passed scrutineering and raced.
- Vice Captain, FMAE Formula Student (2023)** - Contributed to a 3rd-place national finish including 1st place in both design and acceleration, by defending the team's engineering choices to the judging panel.
- Group Captain, Electric Vehicle Project (2022)** - Led a team to 1st place overall among 25 competing teams, by directing the EV build from design through competition.

EDUCATION

Master of Business Administration (MBA) - Business Analytics2024 - 2026

Jain (Deemed-to-be University), CMS Business School, Bangalore | CGPA: 7.1/10

Bachelor of Engineering - Automobile Engineering2021 - 2024

Bannari Amman Institute of Technology, Sathyamangalam | CGPA: 7.4/10
